

# FROM THE MEN IN ORANGE

(YOU WILL BE MORE THAN TANGO'ED)

*Have you had your winch cable snap? If it was steel then you're lucky to be reading this! If it was "plasma/dyneena" or any "other variant" it only hurts the wallet. Still painful but you'll get over it "eventually"*

*Plasma is also a pleasure to work with ASK ANY WINCH MONKEY/HOOK ATTANDANT.*

*There have been a significant number of "inconvenient" plasma failures recently, and listening to people as they repair them, there seem to be a lot of "myths" about the correct way to look after this type of cable! So we did a bit of research and you may find this link useful. [David Bowyer Goodwincc website training and tips on winching](#)*

*[Also some documents on the care of your rope can be found here](#)*

**SEE WE DO CARE.**
